

Mid-term Examination

When/Where: Wednesday, November 5, 9:30–10:20 a.m., N127

Percentage of Course grade: 15%.

Examinable Material: Everything covered in the book up through Section 3.7, plus Exercise Sets 1-3 (including model answers). Material featured on the exercise sets (and model answers) will be emphasized.

Format: Closed-book, closed-notes, closed-computers.

Scope/Difficulty: Because of the time available, I won't expect you to solve problems that are particularly difficult or novel.

Proofs: I will ask you to do one or two fairly easy proofs on the exam. You should make your proof(s) as complete and detailed as possible.

Mid-term Examination (Cont.)

Old Exam: When studying, make use of the old mid-term exam (and model answers) that is on the WWW. Try taking this exam under exam conditions. Some of the questions or parts of questions on the actual exam will be of similar types to those that appeared on the old exam. But you should also be prepared for some questions or parts of questions of different types.
